**Subject:** fire drill  
**Attachments:** FINAL Proposed Plan.pdf

**Importance:** High

Hi Carl,

Had a short and last minute meeting with Carol, John Blevins, Randall and Glenn this morning. John needs a few things from us regarding the EMDF to assist him in communications with senior management and HQ.

One piece: verbatim/direct excerpts from the PP that discuss/describe/state how waste water will be managed and treated for the preferred remedy (CBCV onsite alt). No analysis or commentary. Just pull out what the PP says about wastewater, such as anything that says water will be treated to ARARs before discharge, etc., and paste into a Word document or email (note page number). It may be helpful to highlight the passages in the PP pdf itself, too, for future reference/discussions.

There are a couple of other pieces I will start working on now (timeline for ROD and water management at EMDF vs EMWMF) and send to you for your input in a couple of hours.

I'm sure you have your day planned, but this is time sensitive. COB today or mid morning tomorrow, please.

Cathy Amoroso, Chief  
Restoration & DOE Coordination Section  
Superfund & Emergency Management Division  
U.S. EPA, Region 4
